1. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 2 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wirth et al, US Patent No. 4385147

4. Compounds corresponding to the nucleating agents of applicant's claim 2 are known and are employed in thermoplastic polymers as is disclosed by Wirth et al. The associated ability of the compounds to function as nucleating agents may not be separated from the compounds, therefor it is obvious to use the compounds for that function. See the patent at col. 1, line 5 through col. 3, line 17.
